-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 4/18/06 (Preliminary Amendment).
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 is shown in Figure 1, Species 2 is shown in Figure 1bis, Species 3 is shown in Figures 2a and Figure 2b, Species 4 is shown in Figures 3a and 3b, Species 5 is shown in Figures 4a and 4b, Species 6 is shown in Figures 5a and 5b, Species 7 is shown in Figures 6a and 6b, and Species 8 is shown in Figures 7-9.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: Claims 4, 6, and 8
Species 2: Claims 5 and 6
Species 3: Claims 5, 7, 9, 10, and 11
Species 4: Claims 4 and 7-11
Species 5: Claims 4, 7, 8, and 12-15
Species 6: Claims 4, 7, 8, 12, 13, and 15-17
Species 7: Claims 4, 7, 8, and 18-20
Species 8: Claims 21-28

The following claim(s) are generic: Claim 1 appears generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Species 1 requires that at least one of the cross members is made in two elements and that the suspension elements are connected to the hubs of the front wheels.

Species 2 requires each of the cross members to be made in a single component and that the suspension elements are connected to the hubs of the front wheels.

Species 3 requires that each of the cross members to be made in a single component and connecting rods.

Species 4 requires that the lower cross members are made in two elements and connecting rods.

Species 5 requires that each shock absorber is connected to the lower half arm and the upper cross member.

Species 6 requires that the shock absorber is connected to the middle of the upper cross member.

Species 7 requires that the top and bottom cross members comprise two half-arms each and an oscillating plate to which the shock absorbers are connected.

Species 8 requires two rear suspension groups having a traction transmission system, a coupling system, and an engine unit.

4. A telephone call was made to James Costigan on 3/24/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
